
ChemDraw Institution License

Quick Start Guide for Download Center and Site Gallery

Last Updated: May 30, 2025

Revvity Confidential Information

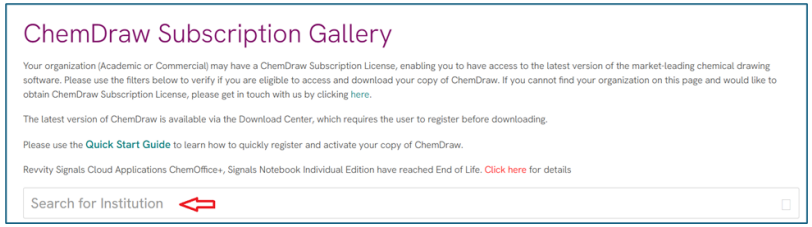
Introduction

Use this document to quickly register and activate your ChemDraw license.

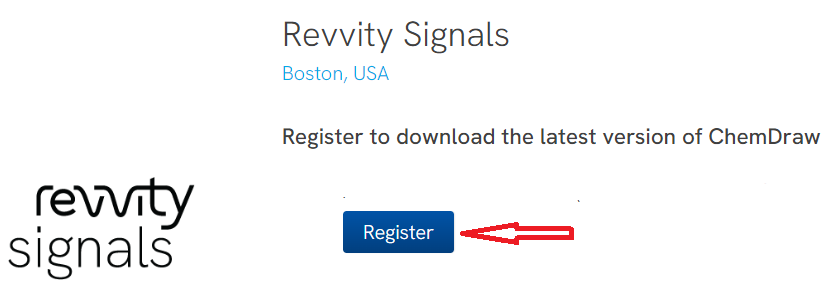
Find your organization's Institution license

To find your organization's institution license:

1. Click the following link (or copy it and paste it into your browser): https://connect.revvitysignals.com/sitesubscription/.



2. Search for your institution by typing the name in the "Search for Institution" field.
3. The first option will be for registering to download the latest version of ChemDraw.
   The example shown here shows the Revvity Signals logo, but your institution's logo will appear in its place.



4. **If you are looking to register for ChemDraw**, complete the Welcome to User Registration page and select "**Submit**" at the bottom of the form.

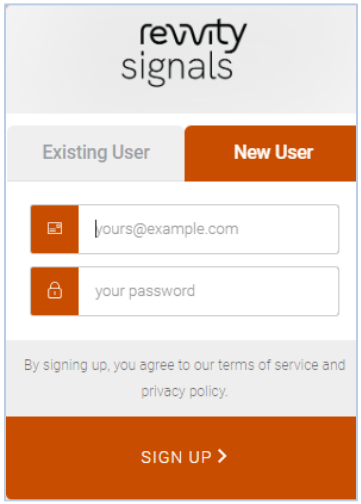
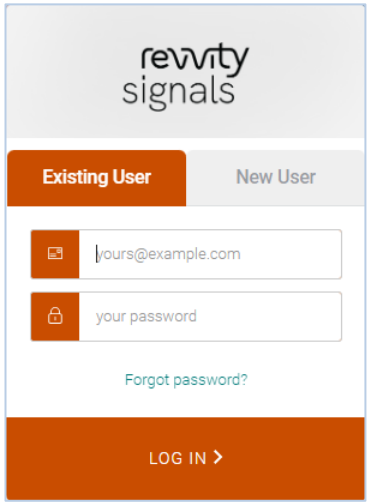
Revvity Confidential Information

5. You will be directed to the http://revvitysignals.flexnetoperations.com/ "New User" website where you will need to enter your email address again and provide a new password. (Be sure to record the new password in a safe location for future use).

If you receive an error message, refer to the Click Here for Login Help option at the top of the login page.



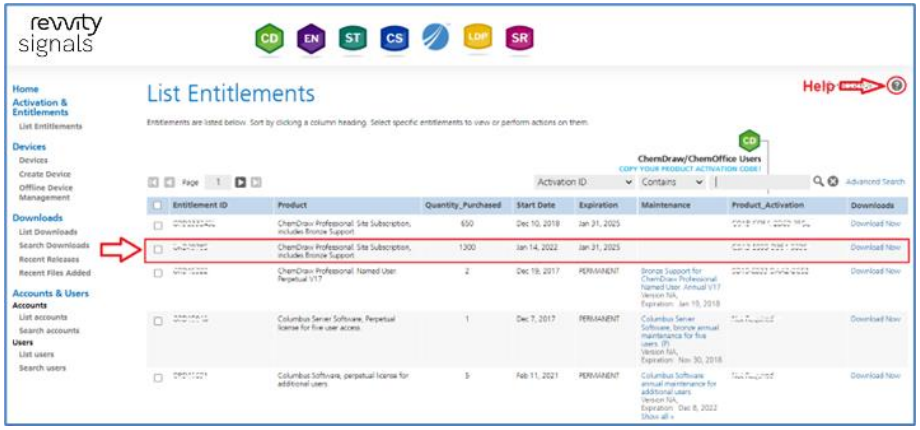
Select "**New User**" to start the process.



If you have previously signed, then use "**Existing User**"

Download Your Software

1. Once you have signed up, you will be taken to the "List Entitlements" page. Find the row with your most recent order number (Entitlement ID column) and record the Product Activation code associated with that order.



If needed, use the "Help" icon to learn more about the contents of the List Entitlements page you are viewing.

2. For your current order, select the "**Download Now**" link in that same row to display the "Download Order" page.
   Find your ChemDraw Activation Code highlighted in yellow. Copy this activation code for your records

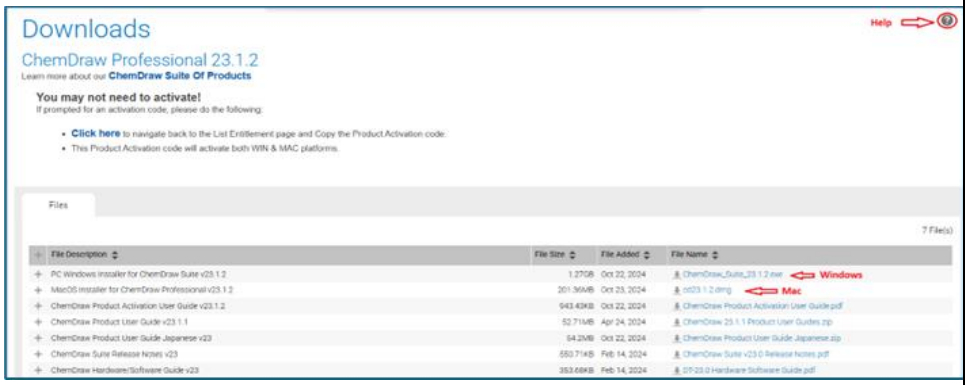
3. To download the most recent version, click the "**New Versions**" tab, and select the Download Package link.
   If you need to download an older version, click the "**Prior Versions**" tab, and select the required version.
4. The "Downloads" page is displayed.
   Scroll down the page and select the correct download option for your type of Operating System (Windows or Mac). To start the download, select the corresponding file name from the "File Name" column.



Use the "Help" icon to learn more about the contents of the Downloads page you are viewing.

Install and Activate ChemDraw

For Windows, there are now 2 installers available:

- For both Signals and Flexera activation, the joint *all users/current user* installers: *ChemDraw* and *ChemDraw Applications*
- *ChemDraw Applications* replaces *ChemDraw/ChemOffice Suite*, which was supplied previously. To install it, *ChemDraw* must first be installed, then *ChemDraw Applications* can be installed.

The following assumes Flexera activation is required.

1. Once you have completed the download of the software to your computer, find the Windows (.exe) or Mac (.dmg) file to run the installer. For Mac (.dmg) simply select the installation file and run it via double click. **For Windows, select the installation file and for:**
   i) a *current user* installation, run it via double click
   ii) for an *all users* installation, use right-click to "Run as Administrator".
   Warning: Do not begin installation before the download is 100% complete.
   Note: during installation, if a previous version of ChemDraw/ChemOffice (v17 and up) is detected, the installer may not prompt you for activation. If it does not ask for activation, then you are ready to run ChemDraw.
2. If it does ask for activation, use the Activation Code you recorded from the "List Entitlements" page above (*Download Your Software*).
3. In the ChemDraw application:

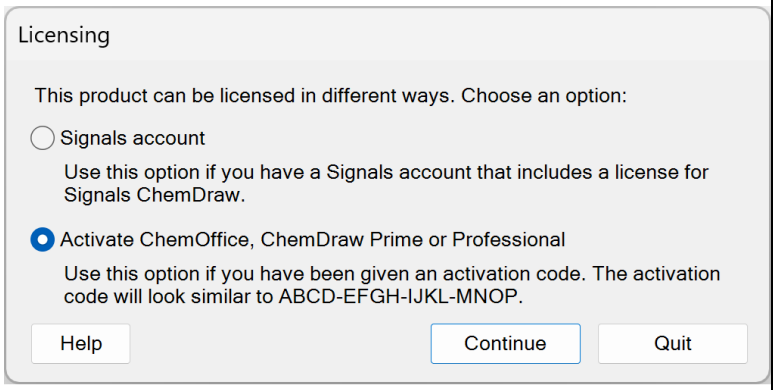
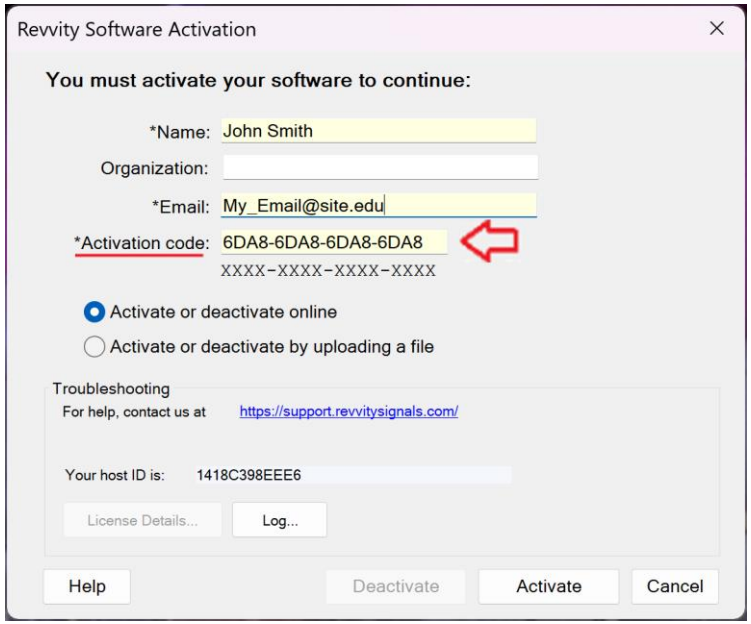
Revvity Confidential Information

a. in the *Licensing* window, select “Activation code” and click “**Continue**”:



b. in the *Activation* window, enter the required details such as your “Name” and “Email”. In the “Activation code” field, enter the 16-digit, four-part code you recorded on the “List Entitlements” page above. Finally, click the “**Activate**” button:



ChemDraw is now activated.

4. If the additional functionality supplied in *ChemDraw Applications* is required, repeat step #1 for this installer and it will replace ChemDraw with ChemDraw Applications. No reactivation will be required.
